

Drinkware Template Instructions

Screenshot of Drinkware Template

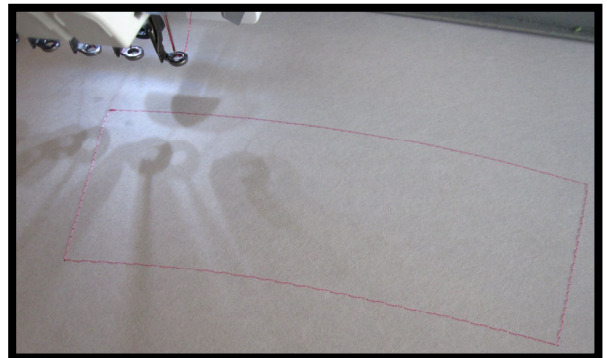

Drinkware Templates consist of 3 basic stitches: the **Placement Stitch**, the **Cutting Stitch** and the **Final Stitch** [Sparse Satin Stitch or Zig Zag Stitch].

Directions

1. Prepare your fabric
 - a. Press
 - b. Iron-on **Fuse Adhere** or another type of fusible backing to prevent fraying and give the insert body.
2. Open the Drinkware Template in your embroidery software.

3. Place your design anywhere inside the template [like pictured above].
4. Save the design and send it to your embroidery machine.
5. Hoop your tearaway stabilizer [cutaway stabilizer is not recommended].
6. Put the hoop in the machine.
7. Start stitching the design on the stabilizer only – the **Placement Stitch** will stitch first – you'll use this as a guideline to place your fabric.

8. You have 2 options at this point:
 - a. Use the printed template pattern to cut the fabric to the exact size and place on top of the **Placement Stitch**.
 - b. Cut a rectangle of fabric larger than the **Placement Stitch** and place it over the **Placement Stitch**.
9. Start stitching again and the **Cutting Stitch** will stitch.
10. If you used the printed template pattern, you can skip to step #12.
11. If you didn't use the printed template pattern, you can take the hoop out of the machine and cut the fabric close to the **Cutting Stitch** like pictured above.

12. Put the hoop back in the machine.
13. Start stitching the **Final Stitch**.
14. Once the **Final Stitch** has finished, your design will stitch!

Things to Remember:

- If you have a multiple needle machine ~ don't forget to place stops between the **Placement & Cutting Stitches** and the **Cutting & Final Stitches**.
- Use tearaway stabilizer so that you can easily remove it.
- Use the same color thread for all 3 template stitches and make sure that it matches the fabric or is a nice contrast because you will be able to see it when it's in the cup.

Picture #1 is finished Small Sippy Cup with insert made with this template, notice the sparse satin stitches on the bottom edge of the cup. Picture #2 shows the nice overlap the insert has on the inside of the cup. Picture #3 shows the back seam of the insert.
