

## **EZ Comfort Backing 1.3 oz.**

EZ Comfort Backing 1.3 oz. is a smooth, soft cover all that is fused to the back side of finished embroidery with an iron or heat press. It produces a finished look and feel, and is perfect for children and infant wear...for anyone with sensitive skin. Use on all of your embroidery to add a unique finished look and feel that will put your business above the rest!

### **How to use**

1. The heat activated side of EZ Comfort Backing 1.3 oz. has a rough feel to it.
2. After embroidering your design, turn the garment inside out to expose the backside.
3. Lay a piece of EZ Comfort Backing over the back side of the design with the rough side down.
4. Trace a trim line about ½" - ¾" larger than the finished embroidery. Be sure to round the corners and cut out.
5. Place the piece over the design evenly with the rough side of EZ Comfort Backing facing down.
6. Fuse on by applying heat at 250° - 270° for approximately 10 - 20 seconds.

Note: Make allowances for testing which temperature and time will work best.
